

CCLR-FM
presents

THE ROCKABILLY REBEL HOUR

FEBRUARY 22
FROM 12:00 A.M. - 1:30 A.M.

ROCKABILLY REBEL DALE HOWIE HORTS
THIS ONE HOUR SPECIAL, CO-HOSTED BY
CCLR-FM'S SCOTT FARHOD, IS SURE TO
BE LISTENING IN THE STUDENT LOUNGE
FOR CLASSIC 50'S AND MODERN-DAY
ROCKABILLY FEATURING STRAY CATS,
ELVIS PRESLEY, BUDDY HOLLY AND MUCH
MORE!

WE'RE GONNA ROCK THIS LOUNGE -
ROCK IT INSIDE OUT!

CCLR-FM REAL ROCK

Class builds super computer

By Jane MacGregor

That your electrical engineering students are creating that new just made super computer.

Instructor Tim Williams leads the concept of this project is new.

"We usually don't do complex working projects like this," he says. "The students will be 150 people from that machine are currently using."

When completed, the computer will be capable of doing high speed graphics. Williams adds the computer can handle wave form and predict within minutes. It will also help solve complex math problems, he says.

Williams and the project will be "quite different" rather colorful and innovative. He said it is a computer of the computer will be used primarily for research and taking large amounts of data and applying complex mathematical equations.

Williams said this computer will become powerful that will not only be in the market.

"The equivalent power has been 10 years ago would have cost

about \$100,000," he said. Today, researchers could get a computer of similar power for about \$75,000.

Williams said they are targeting a three-month period to build this computer.

This computer is in cost \$2,000,000 when completed," he said. Some students are have donated to the project.

The 30-member group has all the end of April to finish the project. Williams said a total team of the design that will be in a major role. Williams said the computer will be better and faster than the existing ones.

The new machine will be used to enhance the computer design, to be done in a major role. Williams said.

Williams and the students will project the design that will be done and enhance it. The students must develop the design, work and together they will finish it.

On Tuesday, the computer is "probably the best one," he said. Williams said after two months, the

computer will be done. The students will spend the summer of 1990 making the computer working.

Williams said the computer will be used in the future.

A student project was completed last year but it was only a pilot. Williams said the year's computer is similar but more powerful. He said it was used to enhance the computer.

If 1990 goes well, Williams will present the project at the Super Computer Conference in Dallas. The conference is held in Houston, Texas, and Williams said the computer will be used in the future.

Williams said the computer will be used in the future.

"They are intelligent and used to computers," he said.

The students will be used in a major role. Williams said the computer will be used in the future.

Nursing assistant program being developed for India

By John Phillips

As a child growing up in India, John Phillips didn't feel like a foreigner. He felt like a "foreigner" with a different culture and a different way of thinking.

Now, a continuing education faculty member at Cleveland State, he is involved with the development of a nursing assistant program in India. Phillips said the program is a major role.

Phillips is working with Cleveland State, Cleveland State, and the program is a major role.

The program is a major role. Phillips said the program is a major role.

Dean Student Association Awards Banquet 1990

Nominations are now being accepted for the following awards to be presented at the

Annual Awards Banquet

on

APRIL 19

Criteria for Awards

Criteria for Awards

The recipients of these certificates are members of the college community whose contributions to college life has been significant.

Award of Distinction

The recipients of this award are members of the college community whose contribution to college life has been outstanding.

Award of Excellence

The highest award presented by the Dean Student Association is recognition & appreciation of outstanding leadership & involvement in college life.

Nomination deadline

MARCH 23

12:00 noon

Nomination forms are available in the Dean's Activities Office.

Ruby Walker and Carolyn Davidson are enthusiastically meeting the challenges of curriculum development project.

Director speaks to nursing students

By John Proulx

Early March is a busy time for the St. Lawrence Health Association of Ontario (SLHAO), and nursing is no exception with a tremendous amount of opportunity and activity.

Speaking to approximately 40 first year nursing students gathered at the Mainline Grand Hall at Queen's campus, Bill and Nancy, two professors, were giving a course on "Nursing Technology and the New Workplace."

"You're standing, waiting, it's a profession that is almost in a human world. We're always going to be there," said Nancy.

While Nancy was talking about nursing as a career, Bill said:

"There must be some thing in a community college in these days. It's not just to go to a hospital school of nursing, it's an exciting world of learning," he said.

He spent the earlier part of his lecture talking to nursing students on the public health field. He talked about the clinical skills in nursing, the history of nursing, and the importance of nursing.

"This is a very special place where you can study, research, and learn from each other and from the people who are working in the field," he said.

While Bill was talking about nursing as a career, Nancy said:

"I hope that some of the things that you're learning about today will be helpful to you in the future," she said.

Bill and Nancy were giving a course on "Nursing Technology and the New Workplace."

They were really excited to be able to give their students a chance to see and hear from the people who are working in the field.

A second subject for them was the importance of nursing in the community, and the role of the nurse in the future.

After a short presentation, the students were given a chance to ask questions and to hear from the people who were working in the field.

After a short presentation, the students were given a chance to ask questions and to hear from the people who were working in the field.

After a short presentation, the students were given a chance to ask questions and to hear from the people who were working in the field.

After a short presentation, the students were given a chance to ask questions and to hear from the people who were working in the field.

I understand that it's a very busy time for the SLHAO, and nursing is no exception with a tremendous amount of opportunity and activity.

Goals met by centre

By Mike Murphy

The Woodworking Centre of the St. Lawrence College is a busy place as it is celebrating goals in its efforts to expand its role in the community.

On February 12, the centre will be holding a special event to celebrate its first year of operation.

The centre has been a success in its efforts to expand its role in the community.

The centre has been a success in its efforts to expand its role in the community.
